

Sandy Lake: What has it been up to and where it is heading in the future?

Come find out how this groundwater-fed lake works. There will be a slide show presentation, old air photos to look at and a cool groundwater flow demonstration with a flow model kit. Effects of future climate change on the lake will also be discussed.

Time: 2:30 pm

Date: January 18, 2020

Presenter

McCuaig, Shirley
