ONOWAY DINOSAUR CORRIDOR CAMP FOR KIDS

AGES 6-12 YEARS

ONOWAY DINOSAUR CORRIDOR CAMP FOR KIDS

5 REASONS WHY KIDS LOVE DINOSAURS

(Source: Rita Martin and Rodger Podger)

1. Dinosaurs are really cool!
2. Dinosaurs let children safely explore a dangerous (Captivating and Perilous) world.
3. Children of all ages can let their imagination run wild with dinosaurs
4. Dinosaurs open a lifelong path to exploring all types of natural history - not just the prehistoric and not just the extinct.
5. An intense interest in a certain topic (dinosaurs) boosts their confidence and helps make friends.

Even so, all of these reasons are secondary to why we host our "Dinosaur Corridor" Camp for Kids....

In the end, we do it for the Fun!!!

FUN in exploring
in discovering
in sharing
in knowing
in understanding

Our camp directors, staff, and volunteers are dedicated to delivering the best possible programs and experiences for children. The time spent at our day camps is very much hands on for children. Fossil finds, expeditions to learn about kids favourite extinct dinos. Nearly 700 in total.

Here kids of all ages will discover behaviors, migration patterns, eating habits, and the captivating matrix of friends and foes in the world that lasted almost 250 million years. Kids will learn how to draw and design their favourite dinosaurs with teachers and artists and learn how to 3-D model. Kids will learn geography and history of the Jurassic, Triassic, and Cretaceous periods and how earth shifted to become what it is today. Amongst other children, they be able to share the positive experiences and foundational learning elevating their confidence in the skills they will need in the world ahead.

TRIASSIC

Young people love challenge and here we give them every opportunity to problem solve. At the Triassic period of camp kids get to explore, discover, research and develop what's found and where it leads

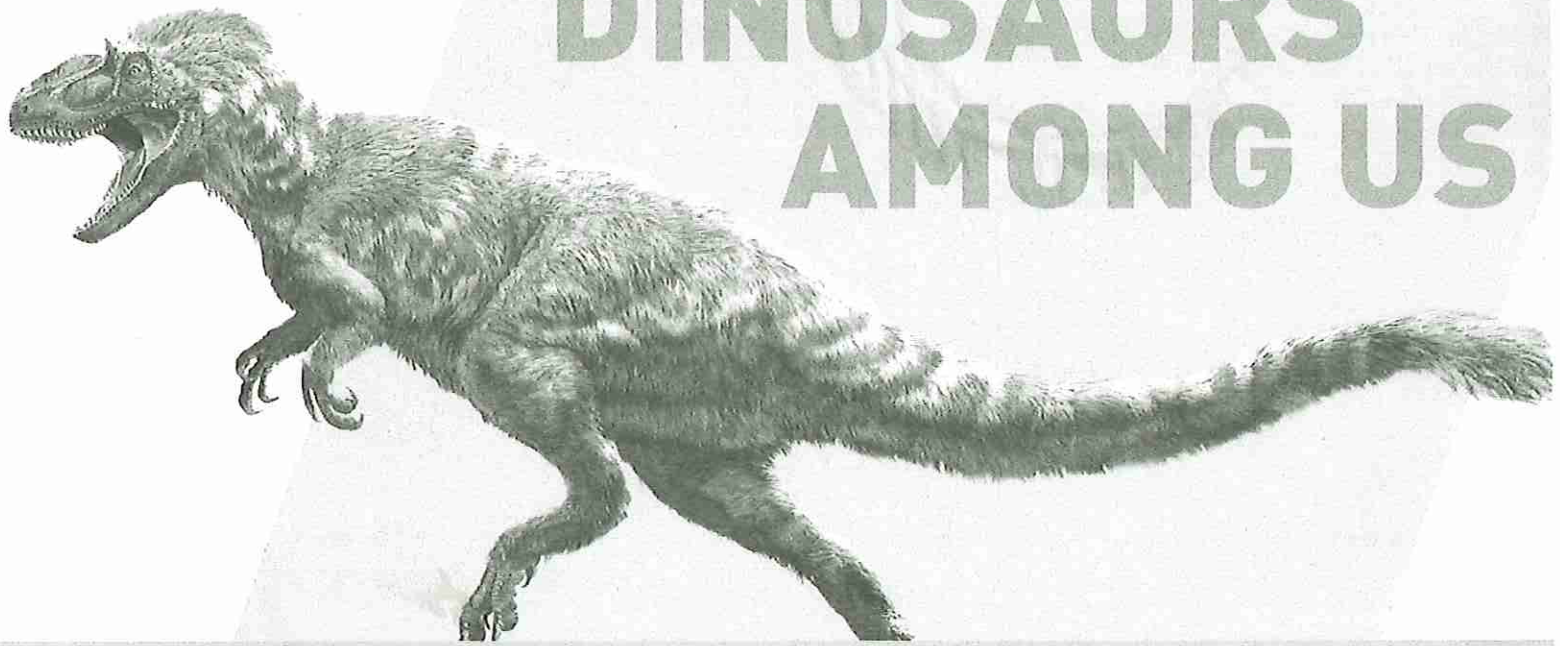

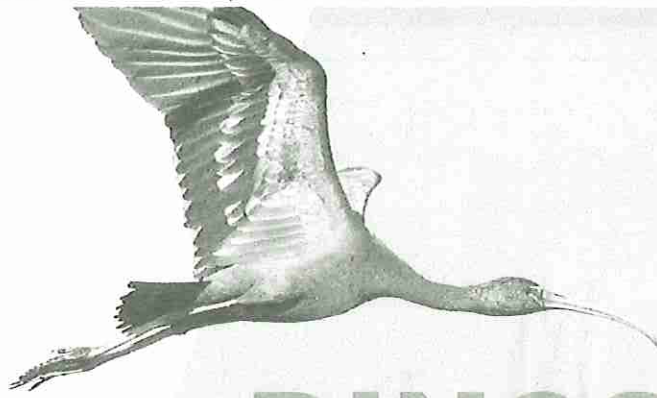

JURASSIC

A time for when dinosaurs evolved into a spectacular variety of creatures. Campers will find mystery and wonderment learning all of the dinosaurs, plant life, the split of Pangaea into 2 supercontinents. Here children learn about the Stegosaurus, Diplodocus and the Allosaurus and how today's fossil discoveries give us answers that date back to year 201 of the dinosaur reign. Fun is in finding, and connecting the pieces of information that leads to more discovery

CRETACEOUS

As the continents split up even more 145-66 million years ago a new world was formed. Campers here learn how we are effected by these changes and what they will be able to report back. Here they become the artists and scientists reporting back on what and how the end of Mesozoic Era teach us how to act responsibly today. Children will learn how to draw their favorite dinosaurs and report on the habits and migration.

DINOSAURS AMONG US

Explore the remarkable evolution story of dinosaurs into birds we see and recognize today.

Dinosaurs Among Us is the flexible, engaging 2D panel version of one of the Museum's popular exhibitions of the same name.

Through vibrant graphics and a suite of videos and soundscapes, the exhibition explores the evolutionary connections between living dinosaurs – birds – and their extinct relatives. This exhibition offers a fresh perspective on a beloved topic, and its flexible format makes it a great option for venues of all shapes and sizes.

BENEFITS

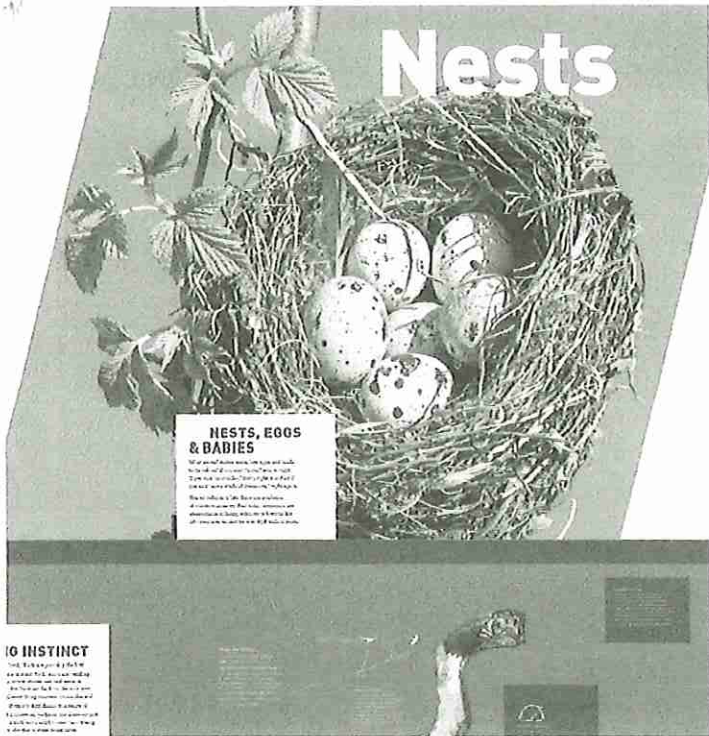

Digital delivery

Flexible design, including indoor/outdoor options

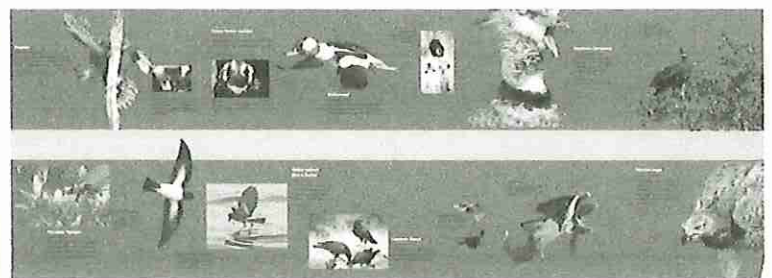

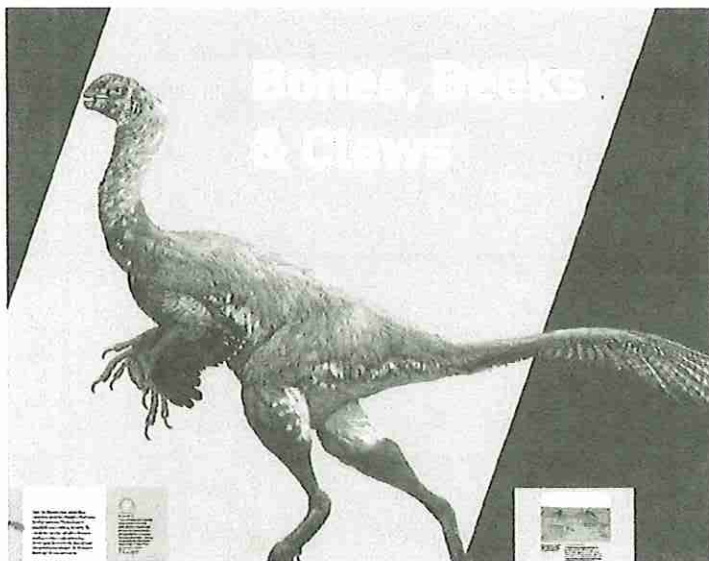

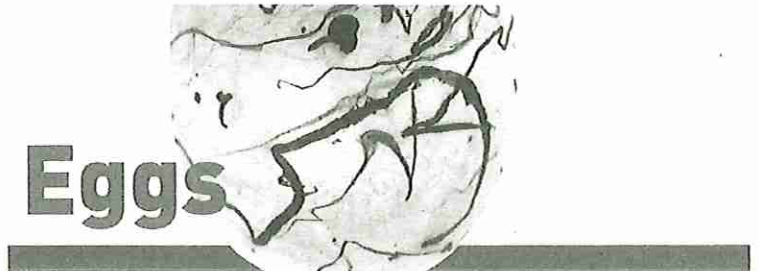

Payment plans available

KEY THEMATIC AREAS

- Introduction – exploring the discovery of the link between dinosaurs and birds
- Babies, Eggs and Nests
- The Inside Story – internal workings that tie birds and dinosaurs together
- Bones, Beaks and Claws
- Feathers
- Flight
- Proliferation of Modern Dinosaurs

LISTEN TO DINOSAURS

Hear calls of modern birds - living dinosaurs. Could extinct dinosaurs have made sounds like these?

A selection of graphic and text panels featured in *Dinosaurs Among Us*.

DIGITAL PACKAGE INCLUDES

- High resolution images and captions
- AV files, including videos and soundscapes
- Introduction and informational panel text and graphics
- Marketing material and press kit templates
- Educator resources
- Bilingual presentation in English and Spanish

Exhibition currently under development. The images in this document are reference only, and may not reflect the final version of the 2D panel exhibition.
